

CHINONSO OLEJEME (DICKSON)

Full Stack Developer • Python / Django • React

Dublin | 089 201 0800 | olejemedickson@gmail.com | github.com/dcsn devs | linkedin.com/in/olejeme

PROFILE

Full Stack Developer with extensive hands-on experience building and running digital products and business systems across e-commerce and social care. Experienced in building end-to-end web applications with Python, Django, React, JavaScript, PostgreSQL and REST APIs, from custom e-commerce platforms to content management, workforce tracking and compliance tools. Comfortable working directly with non-technical staff to turn day-to-day operational problems into practical software. Higher Diploma in Science in Computing — First Class Honours (National College of Ireland) and Diploma in Full Stack Software Development (Code Institute).

TECHNICAL SKILLS

Frontend	React, JavaScript, HTML5, CSS3
Backend	Python, Django, Django REST Framework, Flask, Java
Databases	PostgreSQL, MySQL, SQLite
APIs & Integration	REST APIs, Salesforce APIs, OpenAI APIs, payment and logistics integrations
Cloud & DevOps	AWS, Heroku, Render, Git, GitHub
E-commerce	Custom Django e-commerce, Shopify, Magento, BigCommerce
Business Systems	Salesforce, WordPress, custom CMS development

PROFESSIONAL EXPERIENCE

Care Assistant & Internal Software Developer

2023 – Present

Hata Care Services • Dublin

Care Assistant role held alongside computing studies; software delivered as an internal project.

- Identified gaps in client-service management and independently built a custom Content Management System with Django and React.
- Digitised client-service workflows, documentation and reporting, giving staff faster access to the information they need.
- Developed form-based workflows, role-based access controls and reporting to support operational and compliance requirements.
- The system supported the organisation's preparation and documentation for its 2024 regulatory inspections.
- Worked directly with care staff to gather requirements and translate them into practical software features.

Software Developer (Contract)

2021 – 2023

Ideal Care • Dublin

Contract delivered via ZIT Technology Services Limited.

- Designed and built a custom Content Management System using Python, Django, React and Salesforce to streamline internal processes.
- Integrated Salesforce APIs with custom applications to improve data flow between the CRM and internal systems.
- Built an Employee Tracker System for managing staff information, shifts and workforce records.
- Implemented authentication, user roles and permissions across internal applications.
- Worked with staff and management to map business processes and turn them into working software.

Full Stack Developer — E-commerce Technology

2015 – 2023

ZIT Technology Services Limited • Lagos, Nigeria

- Developed and maintained the company's e-commerce platform and supporting business systems.
- Led the platform's evolution through Magento, BigCommerce and Shopify, culminating in a custom Django-based e-commerce platform.
- Built full-stack features with Python, Django, JavaScript, React and PostgreSQL.
- Integrated payment gateways, logistics providers and other third-party services via APIs.
- Managed migration of product, customer and business data between platforms.
- Set up cloud hosting and deployment on AWS and Heroku.
- Built internal tools and automation for inventory, order management and business operations.
- Worked with designers and business stakeholders to translate commercial requirements into software features.

ADDITIONAL SOFTWARE DEVELOPMENT EXPERIENCE

Software Developer

2025 – 2026

Shop4Vouchers • London • Contract

React, Python/Django, REST APIs, third-party API integration and full-stack maintenance of a commercial voucher/deals platform.
